Analiza zderzeń proton- proton prezentacja rozkładów

Kacper Siatkowski

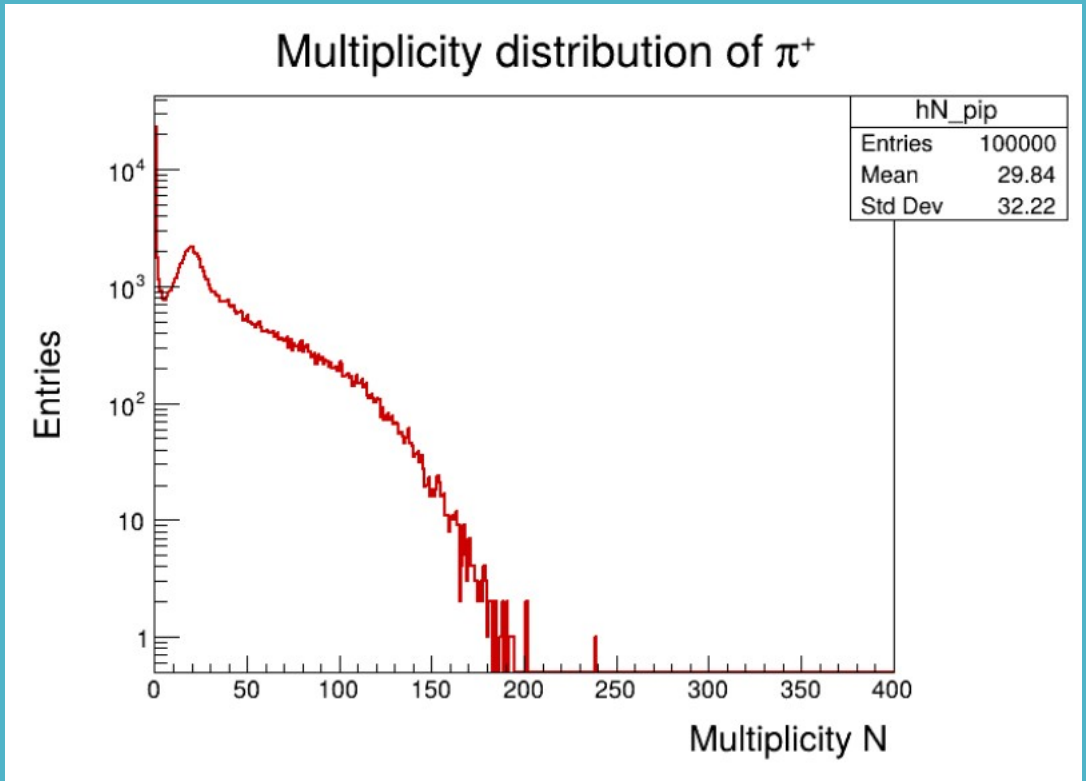

Zderzenia proton–proton wygenerowałem przy energii środka masy $\sqrt{s} = 13{,}6$ TeV

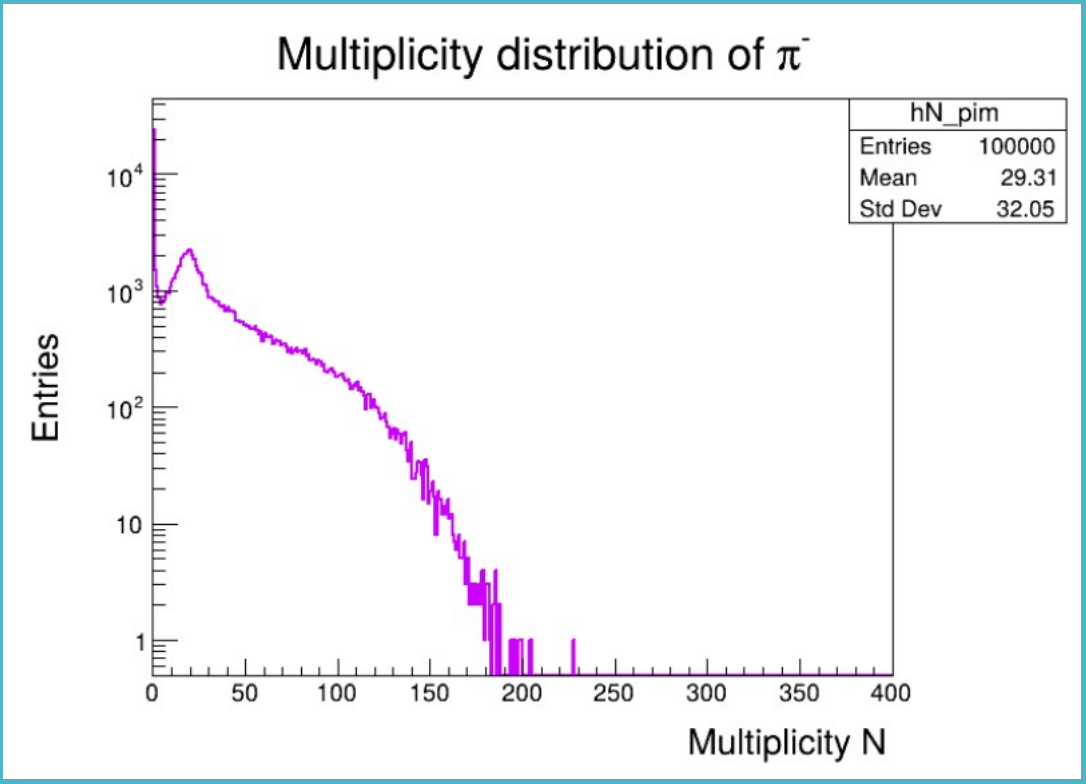

Multiplcity distributions :naładowane cząstki oraz wszystkie cząstki

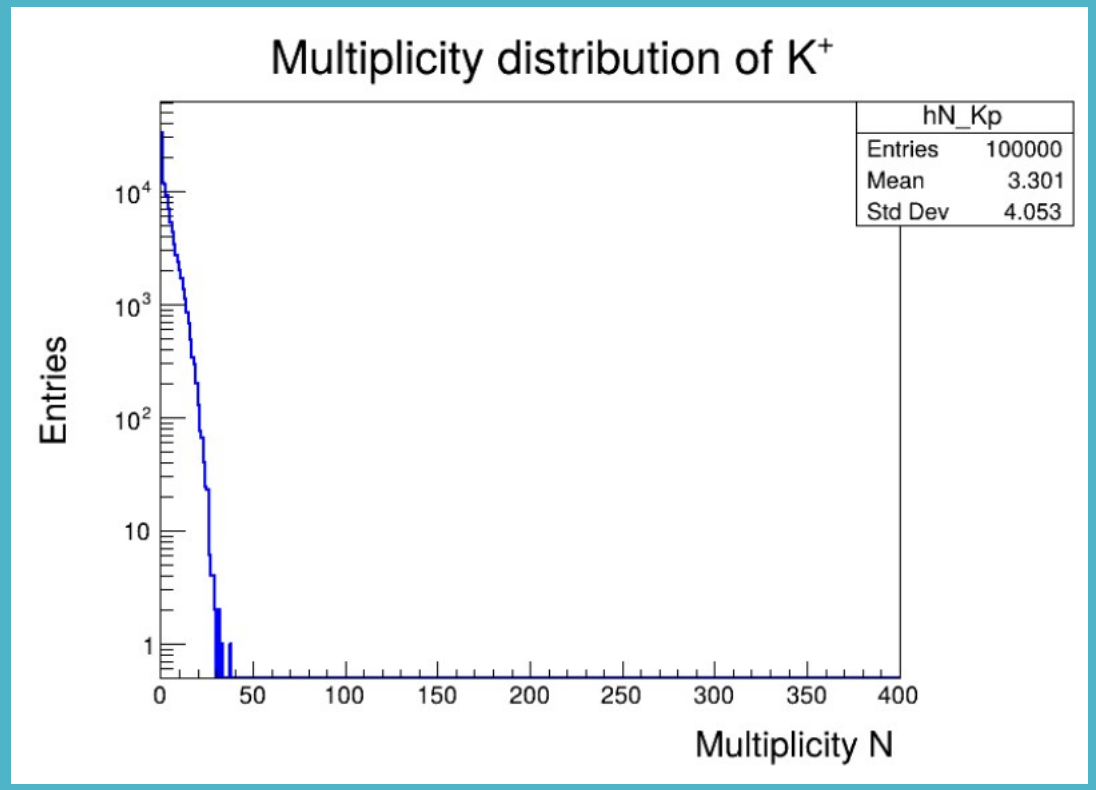

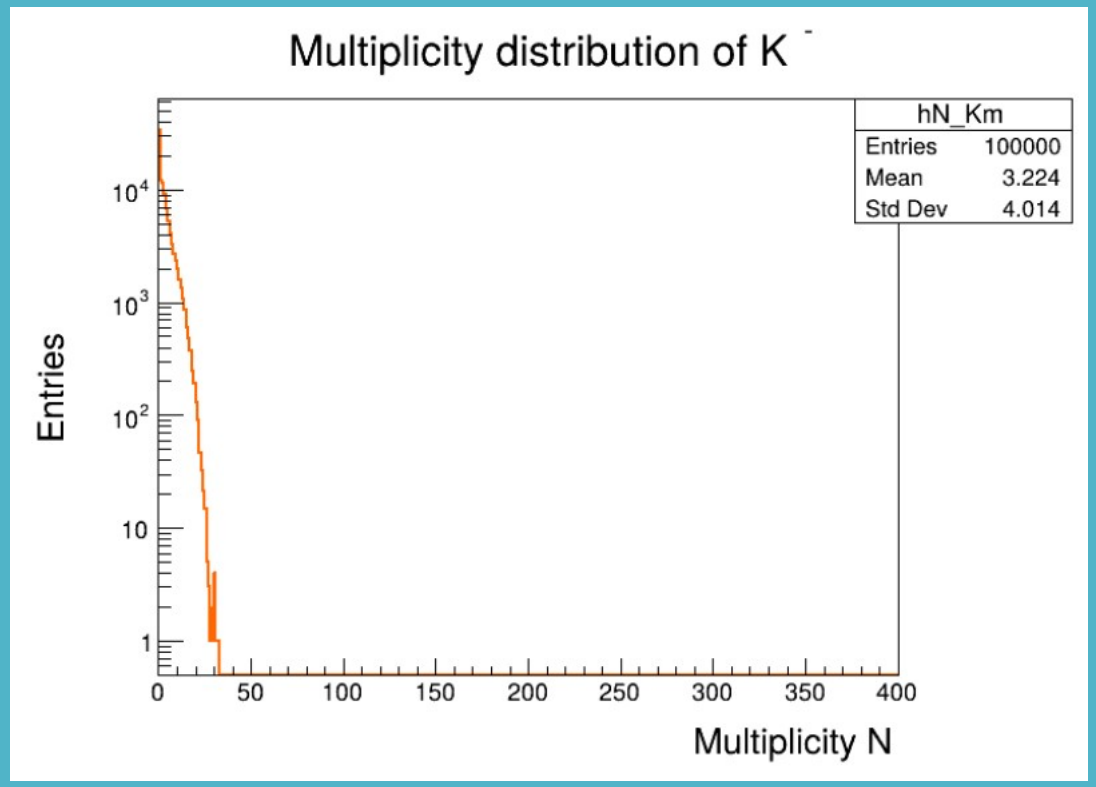

Multiplcity distributions : piony

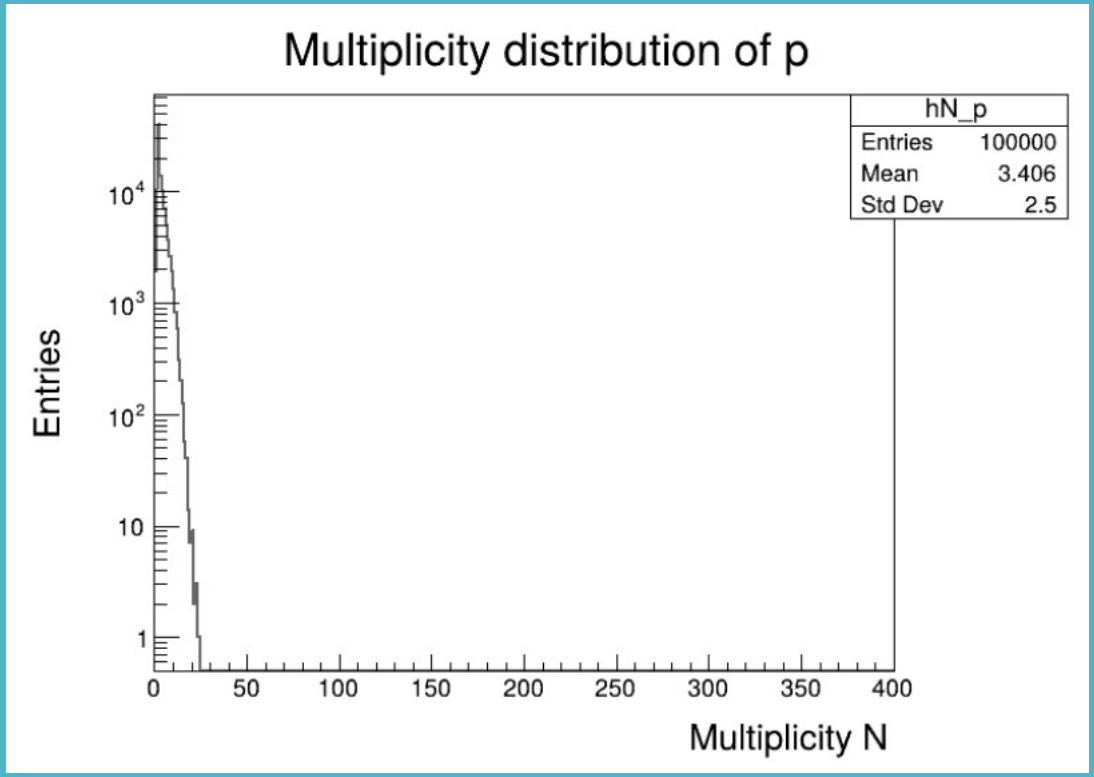

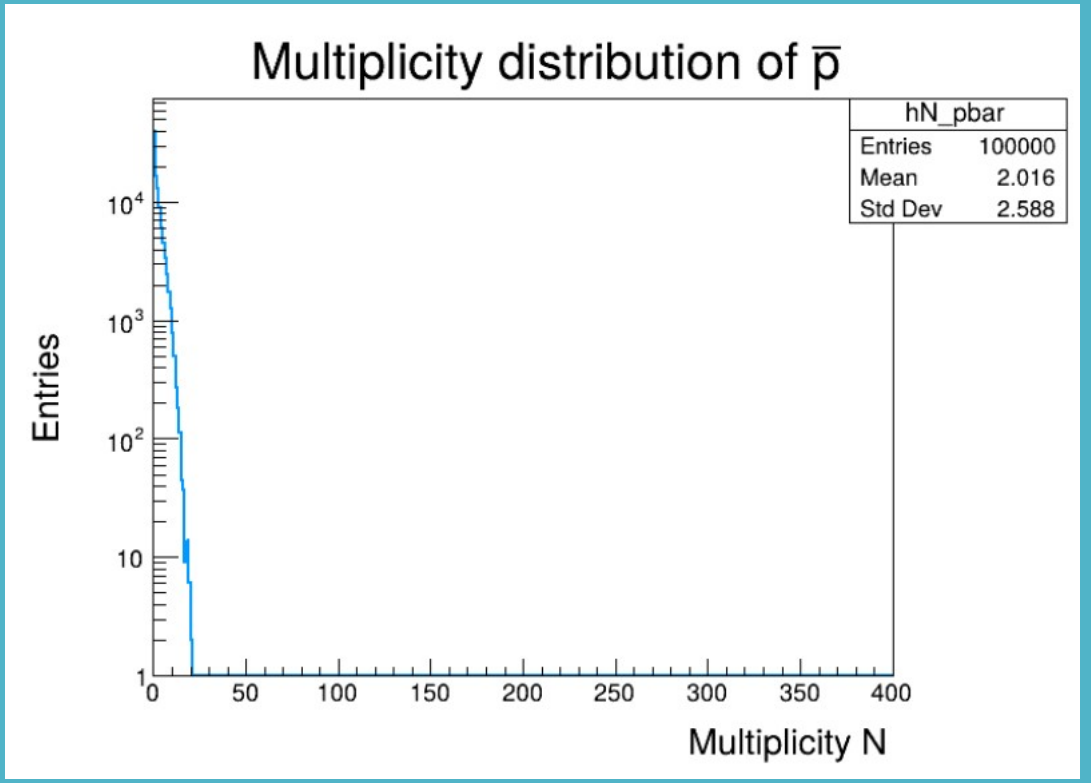

Multiplcity distributions : kaony

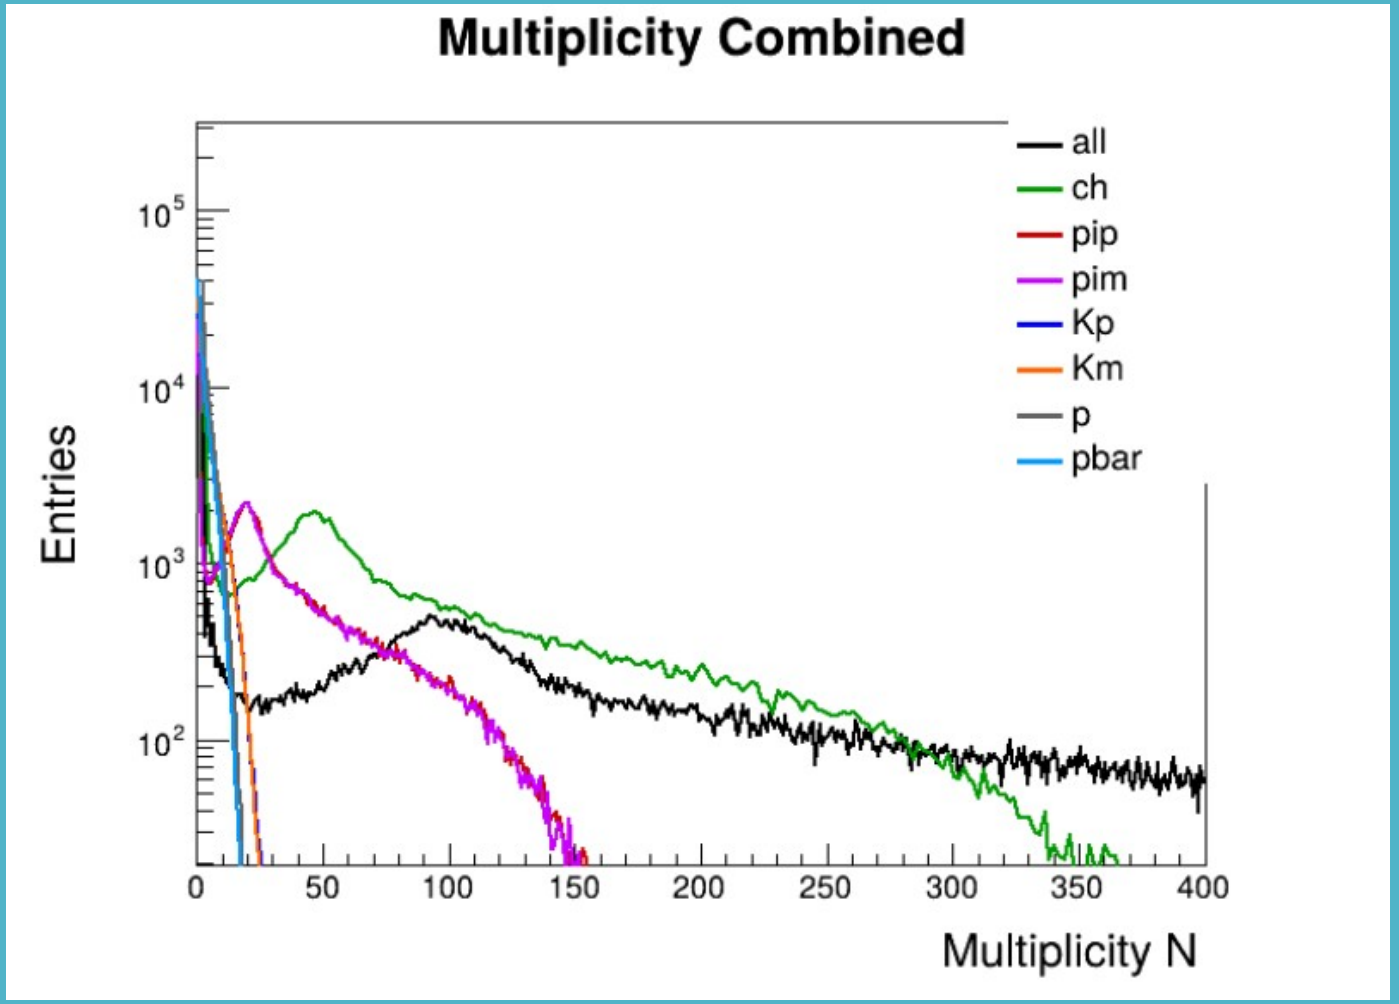

Multiplcity distributions : protony

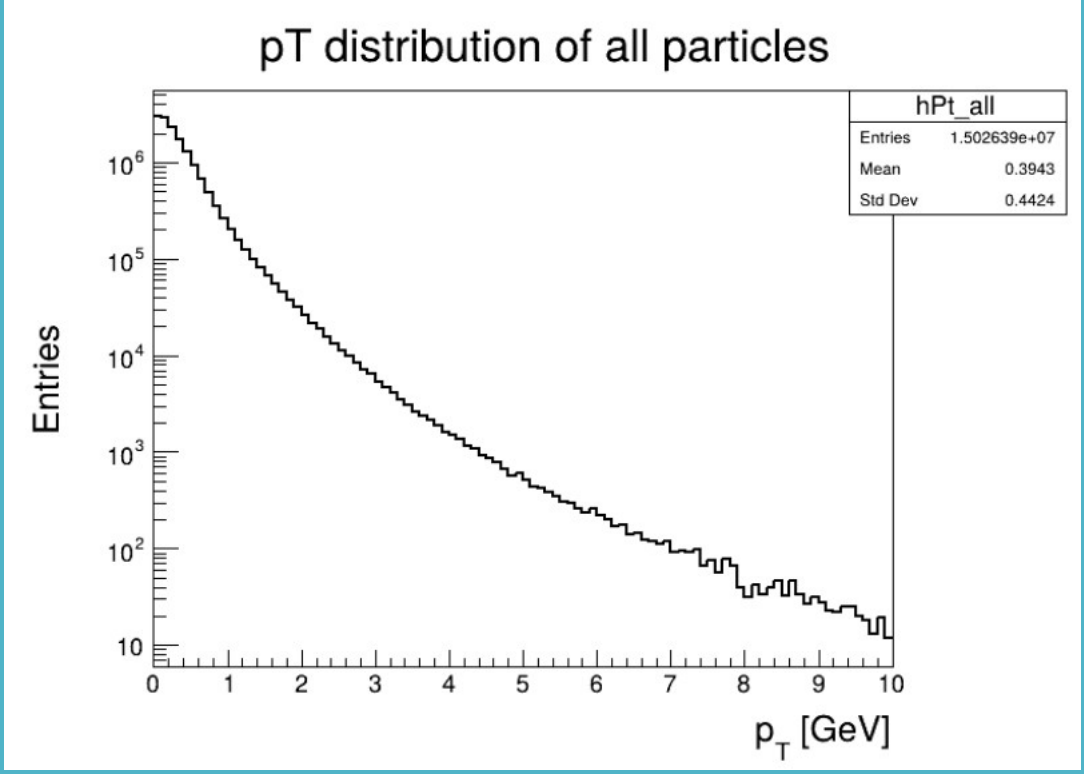

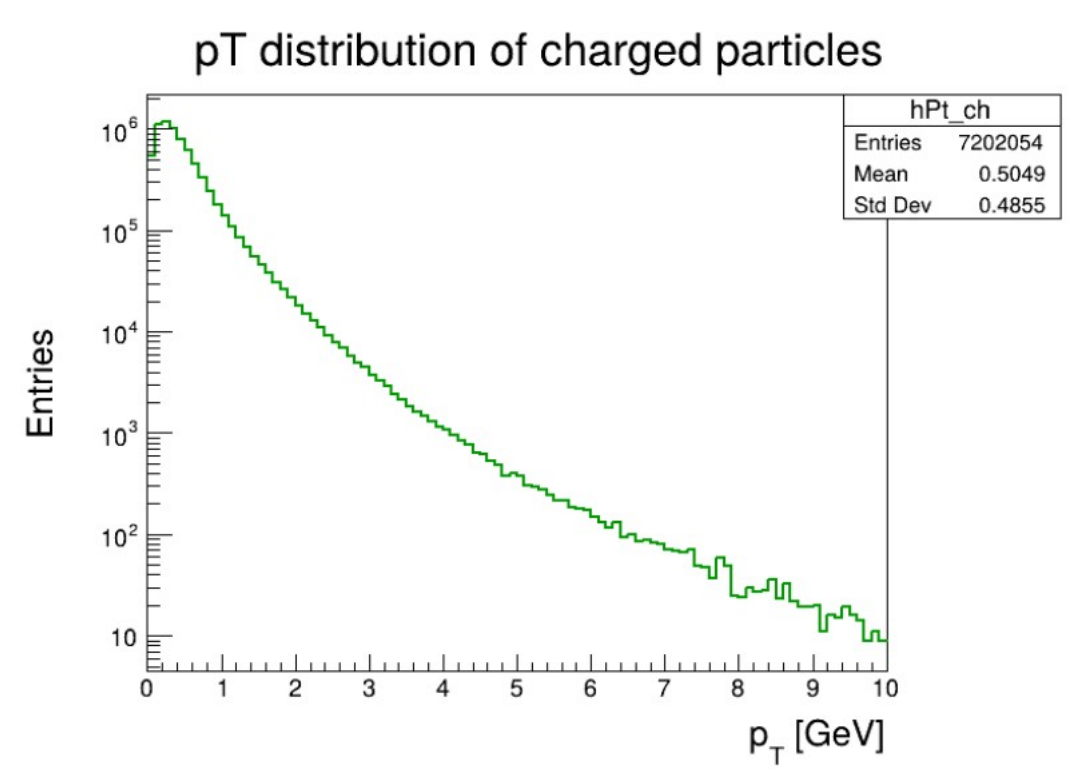

Multiplcity distributions : porównanie

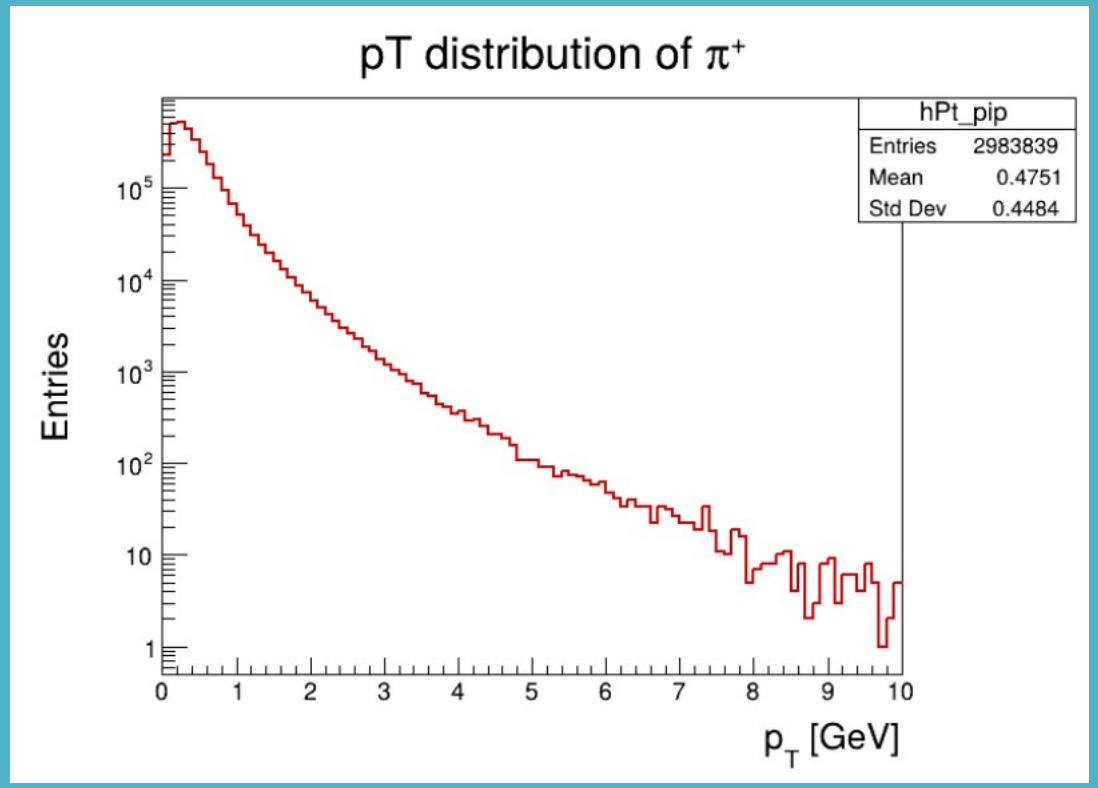

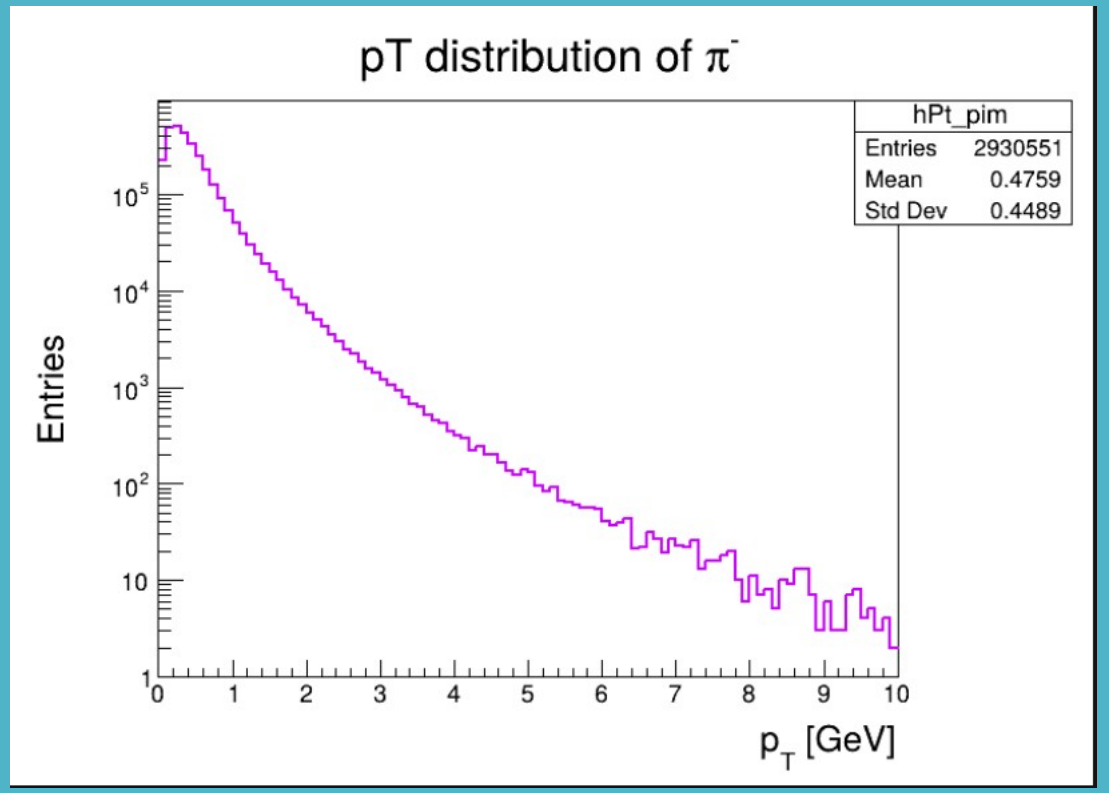

pT Distributions : naładowane cząstki oraz wszystkie cząstki
